Inlet Liners & Liner Supplies - Restek

Solid phase extraction (SPE) is a sample preparation method for the clean-up of samples before analysis with HPLC or GC analysis. SPE offers a number of advantages to the analyst, including less system downtime and troubleshooting, cleaner chromatograms with a reduction of contaminating compounds, and more reproducible analyte recoveries.

Evaluation of basic analytes using a novel hybrid reversed ...

Tailing peaks can be a problem when performing liquid chromatography (LC), and secondary silanol interactions are one of the causes. Using the example of basic drugs, Restek explains what causes them and cover a few steps that can be taken to minimize the effect of these secondary silanols on peak shape when troubleshooting.
