Hello all. New to the site. I'm 49 and have been having lots of menopause symptoms - sweating and hot constantly, poor sleep & feel shattered all the time, difficulty concentrating, sore boobs for half the month.

Not in menopause but have the symptoms - Women's Health

"Maybe it's just perimenopause," my male technician casually said as he left the room. He'd just given me the "good" news -- no apparent cysts or fibroids to explain the heavy bleeding. He just threw it out there, like an after thought, as I lay there, still on my back -- half naked in an open gown.
