Secrecy is the practice of hiding information from certain individuals or groups who do not have the "need to know", perhaps while sharing it with other individuals. That which is kept hidden is known as the secret. Secrecy is often controversial, depending on the content or nature of the secret, the group or people keeping the secret, and the motivation for secrecy.

### Secrecy - Wikipedia

Sometimes when one access key leaks, it creates a domino effect and leads to exposing new secrets. For example, an access key to Slack may give a bad actor access to messages containing new credentials and access codes, so it is very important to make sure that there is no suspicious-looking data!
