The Online Store for Healthcare Management Professionals

The nervous system controls the force of the contracting muscle by varying the number of motor neurons activated at any one time. For each movement, there is a progressive increase in the number of motor units contracting to provide an even increase in tension. Maximum tension in a muscle occurs when all the motor units are contracting.

Muscle Tone - an overview | ScienceDirect Topics

The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) is a federal legislation that required CMS to create the metric-driven Merit-based Incentive Payment System (MIPS) track of the Quality Payment Program to reward clinicians for value over volume based on performance points scored according to national percentiles. MIPS scores determine Medicare Part B reimbursement and rate ...
